Daniel Gachiri

Software Engineer

👤 Profile

An experienced software developer adept at bringing forth expertise in the design, installation, testing, and maintenance of software systems. Want to get your software bug-free? I do my best. Programming is my art, and coding is my craft.

🎓 Education

Bsc. Computer Technology, Jomo Kenyatta University of Agriculture and Technology, Juja

September 2021 — April 2025

I'm currently a third-year student at the university. At the university, I've gained teamwork and leadership skills and have been a team leader for various groups for quite some time.

I'm currently leading a team through the software development cycle, where we'll be building a mobile application that connects patients to doctors within the vicinity.

In my second year, I led a team in discussing the concept of intellectual property, where knowledge of patenting ideas and inventions is very important. With me, they were able to come up with different ideas on what they'd adjust in the transport industry, where various buses keep making losses, whereas their counterparts make profits.

KCSE, St. Mary's Boys High School, Nyeri

January 2017 — April 2021

I completed my high school education here and gained a KCSE certificate.

The experience that I had in high school made me embrace responsibility in many aspects. Besides the normal study schedule, I used to work alongside other boys in areas assigned to us, commonly referred to as duties, such as cleaning classrooms, serving food, and supervising the junior classes in some of these duties.

I used to be the Accommodations Captain and Academics Captain for a year each. That added to my leadership skills and responsibility.

My work had a touch of quality.

✔ Courses

Microsoft Azure Fundamentals, Microsoft

May 2023 — July 2023

Reactjs, Nodejs, Expressjs, MongoDB, SimpliLearn

October 2023 — December 2023
